Planning and Decision Making

- Keep it simple: HTML and CSS only, no Javascript (can be added at a later date once I learn it)
- Make it easy to use and find information
- Short, to-the-point paragraphs
- Projects page is the most important after the homepage: it needs to look good
- Keep the contact form short
- Keep the website condensed: It's mostly going to be used by employers who aren't going to spend long on the website. Keep it short and sweet so it stands out when a potential employers glosses over it

A screenshot of a web browser showing the 'About' page of a website. The header includes navigation icons (back, forward, search, etc.) and a URL bar with the address https://www.danieljhinton.com/about. Below the header is a navigation menu with links: Home, About (which is highlighted in blue), Projects, Resume, Blog, and Contact. The main content area features a large, bold 'About' title at the top. Below the title is a large, empty rectangular box with a black border and a diagonal cross through it, suggesting a placeholder or a redacted section. Underneath this box is a block of illegible, hand-drawn style text. At the bottom of the page is a footer with copyright information '(C) Daniel Hinton 2020' and social media links for GitHub, LinkedIn, and Twitter.

About

I finished high school in 2014, going on to study the Bachelor of Science at Melbourne University, then leaving that to study Law at Australian Catholic University. After failing to complete that too, I found that uni wasn't for me and enrolled for the Coding Bootcamp at Coder Academy, where I am studying now.

My hobbies include Pro Wrestling (Kenny Omega is my favourite), playing guitar, and punk rock music.

You can learn more about me in my blog, or if you're interested in working on a project together contact me.

Navbar and footer static as you scroll

Social media links in footer

Components and Styling

Audience engagement

- Buttons and Navbar links highlight on hover
- Resume page contains embedded PDF file
- Static navbar and footer assist in navigation
- Social media links in footer make it easier for viewer to find them
- Background colour change upon hover on projects and blog page previews
- Contact page has select bar where user can select inquiry type

Alternate colour/font scheme one

Improvements

- Adding a sandwich menu icon on mobile using Javascript
- Adding arrows so you can scroll through the skills section on the homepage as I obtain more skills

- Adding PHP to make the contact form work
- Using Javascript to add a thank you message after the contact form is submitted
